## **Assessment Progress Introduction**

On-time property tax billing is a culmination of a year's worth of work of locally elected officials. The process can be separated into two stages: Assessment-to-Budget and Budget-to-Tax billing. Because these two stages are closely tied, delays in any of the steps in these two stages can have an affect on the timing of property tax bills.

The first step in on-time billing is timely completion of the assessment process, also known as trending, a function of the office of the county assessor. Once the county assessor has completed trending, a report called a "ratio study" is submitted to the state for review and approval. Once the ratio study is approved, the assessor submits the gross assessed values to the county auditor, who then applies deductions and exemptions to determine the final net assessed values of properties. This information is then used to determine tax rates, which translate in tax bills for property tax payers.

The following five reports contain information provided by the county to show their progress in completing the 2007-pay-2008 assessment process.

The first two separate reports are of the Real Property and Personal Property status in a particular county. They show detailed synopsis of progress made, problems or delays encountered, and goals set by the county assessor. Information provided in these reports has been taken from correspondence and conversations with county officials.

The third report is of the status for the county's seven "Data Submissions." While some datasets show a significant "Number of Days Late," there are many factors which cause delays in submission of data that are outside a county official's control. These factors include but are not limited to: prior administration's delays, computer program glitches/problems, delays in receiving required information from other locally elected officials, vendor delays and legislative changes.

The last two reports are charts showing the progress of the county as updated by the county assessor. These visual aids illustrate the timeline of the "year in the life of a county assessor" and show where the county assessor falls in their steps toward on-time tax billing. The summary version shows only the key steps required for completion before their values are submitted to the county auditor. The detailed version shows each of the specific steps and the very detailed processes involved in arriving at a county's final gross assessed values.

Because each report is very technical in nature, please feel free to visit our website at [www.in.gov/dlgf/2339.htm](http://www.in.gov/dlgf/2339.htm) for a glossary of terms used.
